DETAILED ACTION

This Office action responds to application ser. No. 10/805,179 filed on 3/19/2004.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14 and 17-20, drawn to a semiconductor device, classified in class 257, subclass 777.
 - II. Claims 15 and 16, drawn to a method of making a semiconductor device, classified in class 438, subclass 107.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product made and process of making. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, unpatentability of the group-I invention would not necessarily imply unpatentability of the group-II invention since the process of the group-II invention could be used to make devices materially different than those of the group-I invention. For example, the step recited in claim 15 of mounting a first chip

Art Unit: 2814

above a substrate could be used to make a device comprising a first chip mounted face-down above the substrate instead of the face-up chip recited in claim 1.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
